NOW

“From our first days until now, we’ve always been looking forward.”

An Exciting Year is Ahead

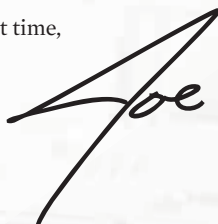

This past year was a major milestone for Horizon. Not only did we introduce several exciting new products but we marked our 30th anniversary. For us, celebrating 30 years is less about where we’ve been and more about where we’re going.

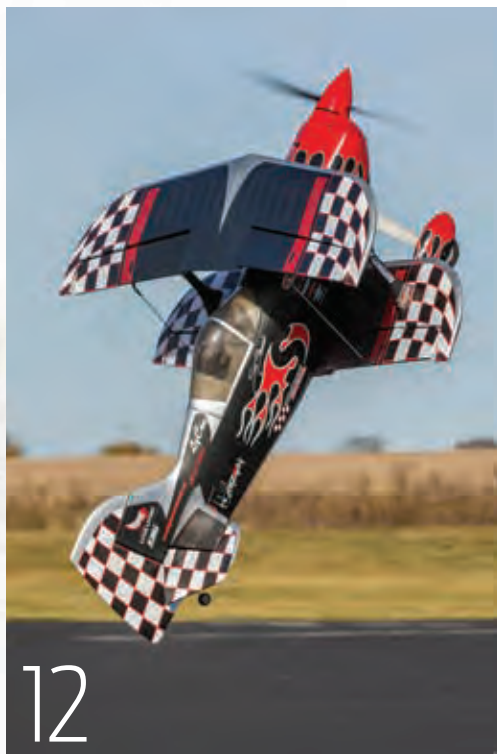

No question, we are proud of past accomplishments. And we will never forget the principles of innovation, service and excellence on which we were established. But it’s no accident that our founders chose the name Horizon. From our first days until now, we’ve always been looking forward.

In that spirit, I invite you to look ahead with me as we begin 2016, a year that will see even more innovative new products. These will include exciting new Spektrum transmitters, FPV-equipped drones and more. This special edition of NOW showcases them all.

In closing, I want to thank all Horizon Hobby customers for their business and wish them the best in the coming year.

Until next time,

Blade® Zeyrok™ Drone

ITEM BLH7360 / BLH7300 / BLH7380
COMP RTF w/CAMERA / RTF / BNF

QUICK LOOK 🔍

Why it's great: Durable drone design, with multiple flight modes for the advancing pilot with the option of adding a camera.

Who will love it: Modellers looking for a first-time quadcopter that flies great, right out of the box, and has a remote control camera option.

Key product features

- » SAFE technology makes learning to fly and flying a drone less stressful.
- » Durable unibody design and maintenance-free motor system allows this easy-to-fly drone to take a beating.
- » Available with a remote controlled 720p/1.3MP camera and removable landing gear module.

FIRST-FLIGHT superstar

**Indoor/
outdoor
drone
performance
and
durability
that rocks**

Avoid first-flight failure: The Blade® Zeyrok™ drone is a versatile quadcopter the beginner pilot can't beat. Designed with a lightweight unibody airframe and an internal motor-drive system that's practically maintenance-free, taking a beating is actually one of its remarkable abilities. Brilliant front and rear LEDs help with orientation and provide status alerts. But the expertly tuned SAFE® technology and flight modes engineered into the flight controller make flying this drone so easy, users will have no trouble keeping it together. And with three versions to choose from—RTF, BNF and RTF with a removable HD camera—it's easy to find the one that's right for you.

Remote Control Camera. Available with the BLH7309 remote controlled 720p/1.3MP camera that includes the optional BLH7302 landing gear module.

Blade® Inductrix™ 200 FPV Drone

ITEM BLH9080
COMP BIND-N-FLY

QUICK LOOK 🔍

Why it's great: Small enough to cruise indoors with the power to have a blast outdoors, the Inductrix 200 FPV drone can give you the immersive experience of riding air.

Who will love it: Drone enthusiasts who want a compact FPV ready aircraft that's easy to fly and works with popular 5.8GHz FPV headsets and video monitors.

Key product features

- » SAFE technology makes learning to fly and flying a drone less stressful.
- » Brushless motors provide an exceptional power to weight ratio for both precise and aggressive flying.
- » FPV ready with a fully integrated flight camera that's compatible with the popular FatShark 5.8GHz headsets.

**A brushless
powered,
compact quad
that's FPV
ready for indoor
and outdoor
drone fun.**

The Blade® Inductrix™ 200 FPV quadcopter is the ideal drone for pilots who want FPV capability in a compact aircraft that's easy to fly. Inspired by the durable micro-size Inductrix design, this larger ducted fan platform features powerful brushless motors and multi-blade rotors that provide a smooth cushion of air. Expertly tuned SAFE® technology helps users fly with confidence regardless of pilot skill level or flight condition. The integrated FPV camera operates with a wide range of viewing screens and headsets. The quick-release 3S LiPo battery pack included features a streamlined case for easy installation while the custom charger will help keep the time between flights short.

Custom Flight Battery. The flight pack included only fits the Inductrix 200 FPV is similar to the flight pack featured on the Chroma camera drone as a high-end safety measure.

Blade®

Vortex 250 Pro

ITEM BLH9250

LEVEL BNF

QUICK LOOK 🔍

Why it's great: Based on two years of pro-level development, its integration of seven 32-bit processors means that every component of this quad operates at the highest level.

Who will love it: RC pilots who want a state-of-the-art FPV race experience that requires no tuning (unless they want to) and the simplicity of Bind-N-Fly® completion.

Key features

- » ProTuned CleanFlight firmware makes this quad fly like it's on rails but the BlackBox feature means any PID tweak is super-easy.
- » NexWaveRF 5.8 GHz video transmitter technology includes 40 channels with RaceBand so up to eight pilots can fly together.
- » Several full-graphic, jet fighter inspired On Screen Display layout options provide critical real-time parameters.

Blade® 120 S

ITEM BLH4100 / BLH4180

COMP RTF / BNF

QUICK LOOK 🔍

Why it's great: Progressive SAFE flight modes help you find confidence in helicopter flying AND with a helicopter that is durable and inexpensive to fly.

Who will love it: Progressing helicopter pilots looking for an indoor and outdoor solution that is easy to maintain and dependable.

Key product features

- » SAFE technology makes learning a single-rotor helicopter less stressful.
- » Simple mechanics combine with durable construction that's lightweight to form a machine that's remarkably easy to maintain.
- » Long flight times are possible on the low-cost 500mAh 1S LiPo battery included.

Length	330mm
Weight	106g
Transmitter	6+ channel
Battery	500mAh 1S LiPo

An ideal way for pilots familiar with coaxial helis and multirotor drones to graduate into a single-rotor machine

The sub-micro Blade® 120 S is slightly larger than an ultra micro machine and a tad smaller than the more expensive 200-size machines, so its hoverable in most living room spaces. It can even fly outdoors in environments where wind would huff-n-puff micro machines away. Fixed-pitch, flybarless rotor mechanical simplicity lets users enjoy extra speed and agility with a design that has a high-level of durability and efficiency. Exclusive SAFE® technology makes staying in control easy by delivering the kind of stability that lets confidence develop quickly. So whether learning new skills, just flying for fun, the Blade 120 S can help pilots master single-rotor flight.

The new flybarless head design offers a higher level of mechanical efficiency as well as a lower parts count which makes helicopter maintenance simpler.

Durable. The lightweight airframe features durable polymers and carbon-fibre components that deliver mechanical precision and the tolerance to absorb typical mishaps.

CAPTURE IT WITH CHROMA®

The Blade® Chroma® camera drone is the hottest item of the holiday season.

From a big hit on the cricket field to laughing with friends in the park, colourful moments happen every day. Now, every detail of these picture-perfect occasions can be captured in high definition from a unique vantage point. Sleek, smart and easy to use, the Blade® Chroma® camera drone delivers high-quality video and stills, taking memories to new heights. There's a Chroma for everyone—from all-in-one-box options to GoPro-ready alternatives. In addition, SAFE® Plus technology gives pilots several flight modes specially programmed to make smooth, steady image capture easy—even for beginners who've never flown a drone before!

Blade® Chroma® Wizard

The pocket-sized Chroma® Wizard condenses all flight and gimbal controls of a Blade® Chroma® camera drone into a small, lightweight unit that works like a TV remote. For instances when a pilot doesn't want to carry around the full controller, the Wizard incorporates flight modes such as Follow Me and Tracking. Additionally, the Wizard has a Point-N-Fly™ function meaning pilots can point to the sky and the Chroma will fly exactly where it's pointed.

Hangar 9® Carbon Cub 15cc

ITEM HAN5065

COMP ALMOST-READY-TO-FLY

QUICK LOOK 🔍

Why it's great: A fantastic flying airplane that replicates the scale looks of the modern Carbon Cub with features such as plug-in wings and an UltraCote™ film finish that make giant scale modeling easy.

Who will love it: Scale and sport AMA club pilots and enthusiasts looking for a large and fun Sunday flier with outstanding flight characteristics and low pilot workload.

Key product features

- » Popular scale subject matter with good looks on the ground and high fun factor while in the air.
- » Realistic with multiple scale features such as shock-absorbing landing gear, operational cockpit doors, scale instrument panel and spinner.
- » Versatility so that pilots can fly off land, rough fields and even water with the new 1/5 scale floats (developed in conjunction with this plane).

HANGAR 9

Every pilot's DARLING

Honours the heritage and versatility of the full scale airplane in traditional all-wood model.

Acclaimed as both a full scale and scale model, the Cub airplane is the sweetheart that makes any fleet complete. The Hangar 9® Carbon Cub 15cc ARF combines classic looks with the higher performance spirit of the modern version from Cub Crafters. At 90-inch wingspan, this giant scale model delivers the feel of a larger aircraft yet fits in most vehicles with ease. Other sensibilities include the use of popular standard-class digital servos and the economical Evolution® 15GX petrol engine. Functional flaps, bungee-type suspension and available floats allows the Carbon Cub to be flown on grass-strips, practice STOL take offs and landings and be flown from your local lake.

Shock-absorbing landing gear: Functional, bungee-type suspension landing gear for great handling, even in rough surfaces.

Simply IRRESISTIBLE

Whether you're an intermediate or advanced pilot, this Corsair is a bent-wing powerhouse.

The E-flite® F-4U-4 Corsair 1.2m is a full-house park flyer that flies as good as it looks. A four-blade propeller, functional three-panel flaps, and rotating retracts add authenticity while AS3X® technology specially tunes it for handling that's rock-solid. Construction with Z-Foam™ material keeps the overall weight low and delivers a level of airframe durability that's ideal for everyday flying.

Impressive landing gear.
Retractable, 90° rotating electric main landing gear (installed)

Pure power. A powerful 15-size brushless power system (installed)

E-flite® Carbon-Z® P2 Prometheus

ITEM EFL10950 / EFL10975
COMP BNF BASIC / PNP

QUICK LOOK 🔍

Why it's great: At the intersection of performance, optimal power-to-weight ratios, rigidity, and low cost construction, you will find the Carbon-Z P2 Prometheus.

Who will love it: Discerning aerobatic pilots who value high performance aircraft but also value the simplicity of foam construction.

Key product features

- » Carbon-Z construction allows a model to be large in size while maintaining very low weight, improving the power-to-weight ratio without sacrificing rigidity.
- » World-class aerobatic pilot, Mike McConville, worked closely with the full-size P2 design and adapted the unique biplane model so that it maintains a scale look and has the ability to accelerate out of a hover.
- » Capable of performing Skip's signature moves with power spare and the kind of control authority that's a pilot's dream.

HIGH-OCTANE aerobatics

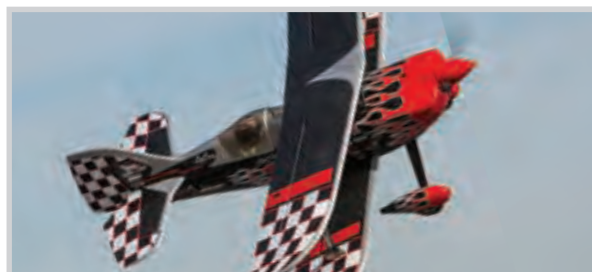

Mike McConville adapted this unique hot rod as a model that can perform extreme moves inspired by the original.

The E-flite® Carbon-Z® P2 Prometheus aircraft is for aerobatic pilots who want precision in an unlimited biplane with unique character. Based on the custom built full scale P2 Prometheus airplane flown by Skip Stewart, Mike McConville adapted the unique design as a model with performance that's as inspirational as Skip's original. Exclusive Carbon-Z technology allows a large model such as this to be rigid like a conventional all-wood airframe, yet lightweight so it can have a performance envelope larger than any other biplane in its class.

SPECS ⚡

Wingspan 1219mm (48.0 in)
Length 1252mm (49.3 in)
Weight 3.2 kg (7.0 lb)

Prized Park Performance

The ultra-popular park flyer is now more affordable than ever.

The original ParkZone® T-28 park flyer is practically a legend. Docile in the air, forgiving durability and power to spare, this E-Flite® T-28 carries on the iconic design in Bind-N-Fly® Basic simplicity. Distinctive in appearance with the look of a growling radial engine up front, frameless two-seat canopy and bulky airframe give this muscular warbird a heavy-metal impression. Engineering with exclusive Z-Foam™ material keeps the wing loading exceptionally light so that it flies better than most heavy-metal warbird models in any class.

Industry-leading control: The full-range Spektrum™ AR610 receiver installed combines the speed and precision of DSMX® technology with the signal security of an active amplified antenna that allows it to pick out the individual transmitter signal with remarkable clarity even in the noisiest 2.4GHz environments.

Brushless motor: The powerful 480-size brushless outrunner motor installed features 960Kv and delivers smooth operation that's surprisingly quiet.

Tricycle landing gear: Steerable nose wheel and rugged wire landing gear allow for smooth taxis, takeoffs and landings. For you hand-launch fans out there, the landing gear can be easily removed.

E-flite® T-28

ITEM EFL4450
LEVEL BNF BASIC

QUICK LOOK 🔍

Why it's great: Whether it's a quick flight at the local park, or relaxing between rounds at a giant scale event, this is the park flyer no one will leave at home.

Who will love it: The E-flite® T-28 park flyer is the ideal model for new pilots looking for the perfect first warbird.

Key features

- » A dynamite flier that's a classic and almost impossible not to enjoy
- » Lightweight construction with durable Z-Foam™ material
- » Industry-leading 4-channel control with the Spektrum™ 6-channel AR610 DSMX® receiver

Thoroughbred Through and Through

A new Mustang detailed to make historic fighter flight more powerful.

The all-new E-flite® P-51D Mustang 1.2m captures the legendary U.S. Army Air Corps fighter at its peak when it was with the 334th Fighter Squadron. Loaded with functional scale detail, its large 1.2 meter wingspan creates a bigger presence in the air yet performs gallantly with a common 2200mAh 3S LiPo. But the exclusive feature that makes this definitive aircraft the choice for having a great flying warbird experience is AS3X® technology. That's because the compact Spektrum™ AR636A DSMX® receiver installed features an AS3X system specially tuned to give rock-solid flight performance similar to the experience of an expert model many more times its size.

Flaps and retracts installed:

The installed main landing gear feature reliable electric retraction with covers over the steel struts and outer gear doors that enhance the scale appearance. A light wing loading, plus operational flaps, gives this warbird a significantly greater flight envelope with the ability to takeoff in shorter distances and land more slowly.

Scale details: This all new P-51D Mustang is abundant in scale detail that include a 4-blade propeller, wing tanks, cockpit instruments and pilot, landing gear strut covers and doors, plus authentic WWII graphics with invasion stripes. The included drop tanks are removable before flight.

E-flite® P-51D Mustang 1.2m

ITEM EFL8250
LEVEL BNF BASIC

QUICK LOOK 🔍

Why it's great: Even standing still, the realistic four-blade propeller, outline and cockpit detail highlight the laser-focused attention to scale appearance.

Who will love it: Whether you are an intermediate or advanced pilot, the P-51D Mustang 1.2m will deliver what flying a legendary thoroughbred is all about.

Key features

- » AS3X® technology delivers a superior flight handling experience
- » Factory installed flaps and electric retracts provide scale experience
- » Scale detail includes an authentic outline, four-blade prop, removable wing tanks just to name a few

AS3X® TECHNOLOGY

Wings of gold

E-flite creates a brushless ultra micro of the immortal classic

The E-flite® UMX™ J-3 Cub model is a lightly constructed airplane that features an authentic outline and essential detail to make this icon stand out. Up front is a 2S brushless outrunner power system that allows pilots to cruise the park at what seems like a walking pace. Plus, there's plenty of power to punch the throttle and master basic aerobatics. But the feature that makes this Cub a cut above all other replicas of the J-3 is AS3X® technology. That's because the AS3X system built into its ultra-micro 6-channel receiver has been finely tuned so the controls give the pilot a feeling of what it's like to fly a giant scale J-3 that's been expertly trimmed. It's the "right out of the box" experience no ultra micro-class J-3 Cub has ever offered.

E-flite® UMX™ J-3 Cub

ITEM EFLU3450
LEVEL BNF BASIC

QUICK LOOK 🔍

Why it's great: The UMX J-3 Cub is an ultra micro scale BNF Basic airplane that features AS3X technology for smooth flight and a brushless power system for outstanding performance.

Who will love it: UMX pilots looking for an ultra micro J-3 with the 'big model' feel that's only possible with AS3X technology.

Key features

- » Scale markings, engine and surface detail that make the aviation icon come alive
- » Brushless BL180, 2500Kv outrunner motor and 2S LiPo power for an ultra micro experience that doesn't wane on performance
- » Advanced AS3X® technology delivers flight so smooth it's as though the pilot is in command of an expertly tuned giant scale airplane

UPWARD MOBILITY

Superior trainer technology makes it easy for anyone to experience the joys of soaring.

New RC pilots with their sights set on soaring can earn their wings behind the sticks of the HobbyZone® Conscendo™ S motor glider. Built from lightweight and durable Z-Foam™ material and equipped with a 1.5-meter wing, the intuitive Conscendo S makes hitting max altitude easy and fun because it offers pilots 4-channel control freedom and SAFE® technology. With SAFE, new pilots can progress through multiple flight modes and instantly return to steady flight with a push of the Panic Recovery Mode button. Brushless motor power means that pilots can gain altitude to search for thermals quickly while the industry-leading Spektrum™ DSMX® 2.4GHz technology connection can get them there with confidence, even from afar.

HobbyZone® Conscendo™ S

ITEM HBZ8600 // HBZ8680
LEVEL RTF // BNF

QUICK LOOK 🔍

Why it's great: Just launch and climb to the desired altitude, bring down the throttle, watch the propeller fold and you're ready to catch thermal updrafts. It's that easy.

Who will love it: Anyone that wants to experience the purest form of flight with the ease and simplicity that you can only get from a powered sailplane and SAFE® technology.

Key features

- » SAFE technology makes learning to fly less intimidating
- » Elegant and efficient design combines the best features of a trainer and sailplane
- » Brushless power, the potency of a LiPo battery in a lightweight airframe with high-lift wings makes longer flight times possible
- » Removable 2-piece wing for easy transport

Battery	1300mAh 2S LiPo (included)
Transmitter	4+ Channel DSMX® (RTF only)

SAFE® TECHNOLOGY

Panic button: Instantly return the Conscendo S to smooth, steady and even flight with the push of a button in any flight mode with SAFE® Technology. This greatly reduces the possibility of a severe crash so you can fly with confidence.

Proportional control: The Conscendo S gives pilots the freedom of 4-channel control with working throttle, rudder, elevator, and ailerons. Best of all, pilots will always experience precision with reliable 2.4GHz DSMX technology built in.

Ride the wind: The Conscendo S features a 1.5m wingspan and a folding propeller so you'll get maximum lift when you catch a thermal updraft and stay as aerodynamic as possible whenever you lower the throttle.

Spektrum DX8 G2 8-channel system with AR8000 receiver

ITEM SPM8000 / SPM80001
COMP MD2 / MD1

QUICK LOOK 🔍

Why it's great: Now with diversity and generation 2 features, the DX8 is back and here to stay. Buy the system and get an AR8000 DSMX receiver. The DX8 is back and at a price that is as enticing as it is competitive. It's the ultimate 8-channel transmitter featuring diversity and generation 2 features.

Who will love it: It's perfect for the pilot looking for an advanced eight channel radio with features and pricing that fit between the DX6 and DX9 systems.

Key product features

- » 11ms frame rates with capable receivers
- » Airplane, heli, sailplane and multirotor programming with 250-model internal memory
- » Programmable voice alerts lets pilots keep tabs on important functions without ever taking their eyes off the aircraft.

SPEKTRUM.

THE LEGEND returns

The next-generation Spektrum™ DX8 redefines the standard for 8-channel excellence

The return of the legendary Spektrum DX8 takes 8-channel sophistication to new heights. The new transmitter features capabilities eclipsing almost everything in its class such as voice alerts, 250-model memory, and wireless trainer. Also included is the latest generation 2 programming offering you an intuitive, yet diverse set of programming options as well as the ability to download and share model setup files across all Spektrum generation 2 transmitters.

Diversity Antenna. Using a combination of arrays, the antenna provides superb protection against polarization blind spots, ensuring the receiver always "sees" the signal.

Programming Features. The DX8 comes with an impressive list of programming features that rivals more expensive transmitters.

Second to **NONE**

*Prototype shown

**On a scale
of 1–10, this
transmitter
deserves a 20**

From its premium construction and comfortable ergonomics to its powerful programming features, the Spektrum™ DX20 20-channel transmitter delivers a pro-class flying experience that is second to none. In fact, it's the only transmitter in its price range equipped with machined aluminium gimbal. The Spektrum™ AirWare™ software that comes in the DX20 gives expert pilots all the programming features they could want along with a few they never knew they needed. Its intuitive SimpleScroll™ interface makes navigating menus and changing settings as simple as “roll and click.” The weight distribution and ergonomics of the DX20 have been optimised to fit the way you fly. The result is a sense of balance and comfort that perfectly complements the speed and precision of DSMX technology.

Spektrum AirWare Updates. Exclusive Spektrum AirWare keeps the DX20 updated with the latest features and benefits available. Users also enjoy access to a growing library pre-set model setups for the most popular Horizon Hobby aircraft.

Secret WEAPON

Top level racers looking for the competitive edge in control should look no further.

The Spektrum DX6R Pro is the next-generation race transmitter based on the award-winning reputation of the DX3R/DX4R. This pinnacle platform features an entirely new mechanical design with fine-tuned ergonomics so that it's one of the most ergonomically friendly transmitters on the market. High-end features like ball bearing support of all moving devices provides extremely smooth and precise operation while the touchscreen interface delivers programmability that can keep up with the fast-pace today's racers demand. Voice alerts speak lap times, telemetry information and menu items so users never have to take eyes away from what they're driving. Plus the included high-capacity Lithium Ion battery and integrated charger means that drivers get the control they need longer.

The Best Just Got Better

The Team Losi Racing 22™ 3.0 has taken the championship-winning 22™ 2.0 buggy and pushed the envelope to a whole new level. Plus, it's more affordable than ever.

The 22™ platform is the flagship for Team Losi Racing® and the third generation of the 22 buggy continues the tradition. Focusing on the now dominant rear motor configuration, the 22 3.0 has been tested and developed by Team Losi Racing's world race team to exemplify the pinnacle of performance on all surfaces. The all-new wider 2.5 mm chassis and mud guards allow for saddle or shorty LiPo battery packs for a range of tuning options. Additionally, an all-new front caster block and suspension arm gives the 3.0 a more consistent steering feel on a variety of different surfaces. Still included are staple features like GenII 12mm big bore shocks, the 14-Ball tungsten carbide differential, the HDS Slipper System, 2.5mm aluminium chassis, and TiCN coated shock shafts and hinge pins.

Revised motor location: On the 22 3.0, the motor has been moved back and closer to the diff gear by a whopping 12mm, allowing for more rear grip on exit, more entry steering, and an overall easier to drive buggy.

“No compromises” mid-motor design: Designing a mid-motor specific car allowed the engineers at TLR to avoid compromises and provide the best in mid-motor for racing performance and durability.

Team Losi Racing® 22™ 3.0 Race Kit: 1/10 2WD

TEAM LOSI RACING

Evolution of excellence

The next generation of the nitro buggy from Team Losi Racing® improves drivability, design and performance.

Building upon the heritage of the 8IGHT™ buggy, the 8IGHT 4.0 elevates perfection and is poised to dominate the track. Designed to be the professional's choice in 1/8-scale off-road buggy racing, this latest version continues the tradition of winning and dedication to superior engineering. As with every incarnation of the award-winning 8IGHT platform, this new version is a championship contender the world over.

Optimised drivetrain layout: Engine has been repositioned to reduce front driveshaft angle, which will allow the drivetrain to transfer more power to the front.

Improved suspension geometry: The 8IGHT 4.0 suspension geometry has been further refined and optimised providing drivers of all experience levels a neutral to drive buggy that can achieve fast lap times, and still have the ability endure hour long mains with minimal mistakes.

TWICE the edge

**Get the
advantage over
nearly any race
boat in its class
with a double
dose of speed.**

The Pro Boat® Zelos™ 36 Twin catamaran comes ready to conquer the competition with a double dose of speed and catamaran precision. Featuring twin 6-pole, 2000Kv brushless motors, this 36-inch catamaran is easily capable of reaching pulse-pounding speeds in excess of 60mph. From tip to rudder, the Zelos is built for the long haul with a hand-laid fiberglass build that can hold up to aggressive speeds and nearly any driving style.

Ballistic 60 MPH Speeds. The catamaran comes loaded with an insanely powerful twin 6-pole, 2000Kv brushless water-cooled high-torque motors delivering insane speeds.

WRECK

the wake

Make brash boating stress-free with a revolutionary self-righting hull.

Self-righting hull design. Designed to be as stable as possible and to self-right on demand if you ever flip it.

Open up the limit and push RC boating fun to the edge with the Pro Boat® Recoil® 26 Deep-V. This uncompromising competitor delivers insane accelerations and mayhem-inducing momentum thanks to a 2100Kv brushless motor and 3S compatible 60 AMP ESC. Featuring a self-righting system, boaters can drive with reckless abandon by knowing a return to a race ready position is as simple as punching the accelerator.

Pro Boat® Recoil 26-inch self-righting Deep-V brushless

ITEM PRB08022
COMP RTR

QUICK LOOK 🔍

Why it's great: Have fun on the water without the worry of capsizing. Competitive products don't have waterproof electronics or the quality components included here.

Who will love it: Perfect for beginner and experienced RC boaters that want a very easy to use, fast boat they don't need a retrieval boat or system to retrieve.

Key product features

- » Easy entry point into RC boating simple setup and quick start time.
- » The self-righting hull allows the user to be able to rescue a flipped boat and keep running with a quick pull of the throttle.
- » Waterproof electronics: no receiver balloon like the competition.

NEVER SLOW DOWN

Rock the boat

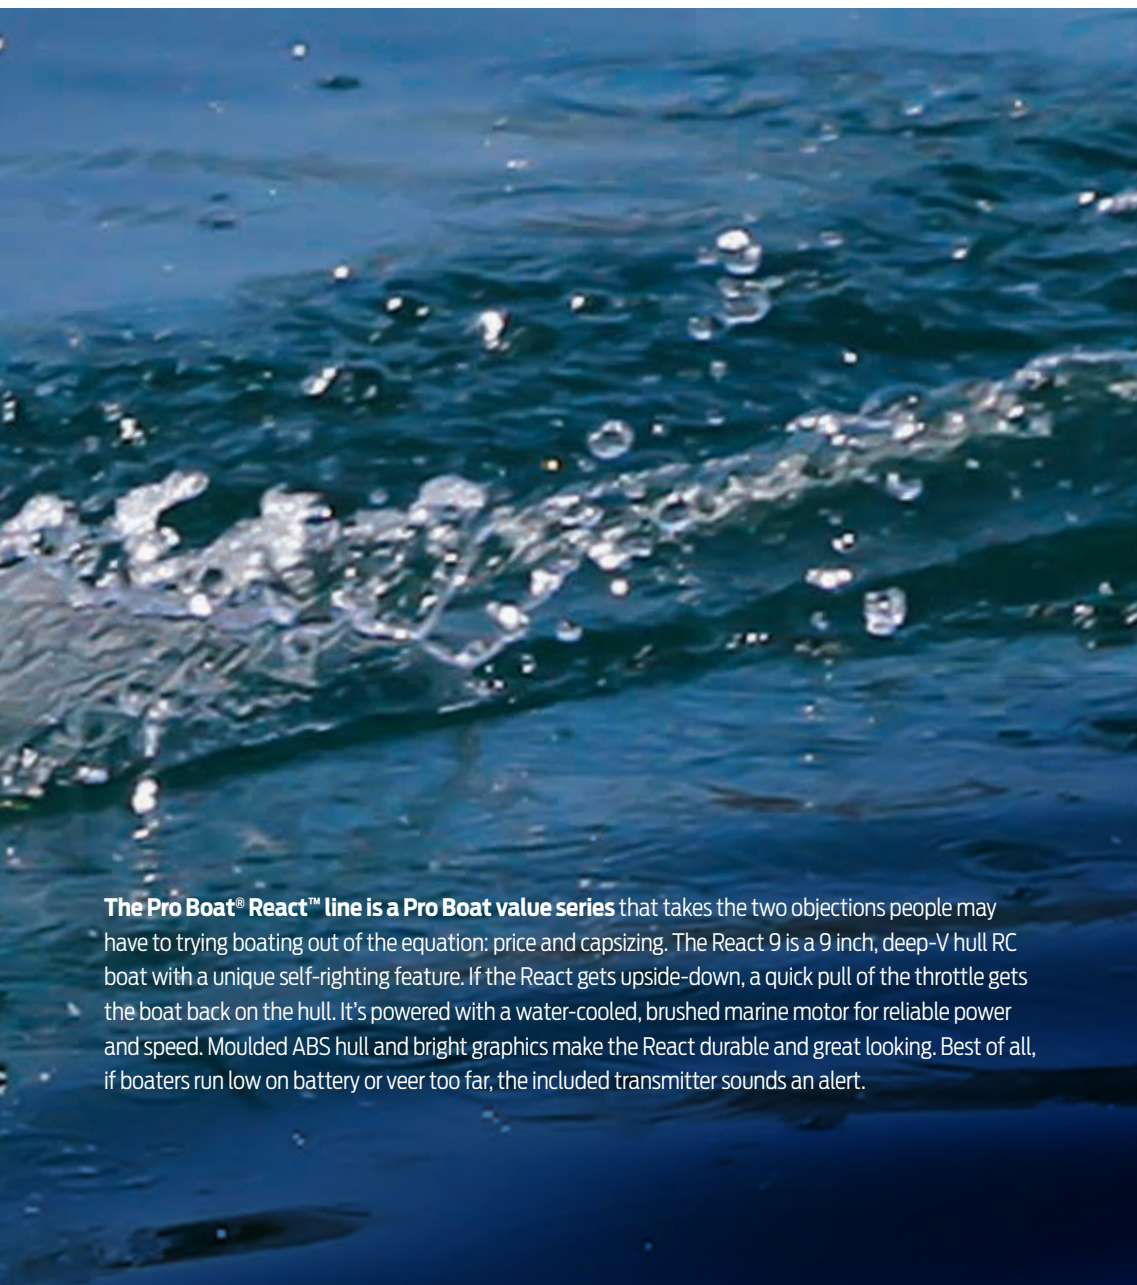

The Pro Boat® React™ 9 deep-sixes the fear of capsizing and battery drain, all in an attractive package.

Self-righting hull: The hull of the React 9 was designed to turn over on demand if it ever flips.

Sleek design: The boat's streamlined hull and compact design provide impressive handling and ability to run in relatively small bodies of water.

The Pro Boat® React™ line is a Pro Boat value series that takes the two objections people may have to trying boating out of the equation: price and capsizing. The React 9 is a 9 inch, deep-V hull RC boat with a unique self-righting feature. If the React gets upside-down, a quick pull of the throttle gets the boat back on the hull. It's powered with a water-cooled, brushed marine motor for reliable power and speed. Moulded ABS hull and bright graphics make the React durable and great looking. Best of all, if boaters run low on battery or veer too far, the included transmitter sounds an alert.

Pro Boat® React™ 9 Self-righting Deep-V

ITEM PRB08023

Losi® Mini 8IGHT-T™ RTR, Maifield and Phend Editions

The success of the Mini 8IGHT and the Mini 8IGHT-T over the last few years has sparked interest in the mini category. These two new versions mirror the current Mini 8IGHT-T, but with the trim schemes of Team Losi Racing® multi-time ROAR National Champions Ryan Maifield and Dakotah Phend. They come completely ready to go with everything needed to hit the ground running. Plus, Spektrum AVC technology is preinstalled and controlled by the included Spektrum DX3E V3 transmitter, providing the most positive experience drivers can have.

Item	Description
LOS01010	Mini 8IGHT-T RTR, Maifield Edition: 1/14 4WD Truggy
LOS01011	Mini 8IGHT-T RTR, Phend Edition: 1/14 4WD Truggy

Evolution® 62GX 62cc Single-Cylinder Petrol Engine

For the serious petrol engine and competitor pilots, the new Evolution® 62GX is a potent 62cc engine that's ideal for your 50–60cc petrol powered project. The rear genuine Walbro carburettor fits into more spaces, and the muffler mounting carburettor points are spaced to fit a wide variety of headers and silencers. The ignition system allows you to choose from a variety of power options and the four-bolt propeller mounting pattern matches other popular designs to make propeller changes simple.

Item EVOE62GX

Spektrum DX6 Update

The updated DX6 now features a diversity antenna for even better signal security and faster 11ms frame rates. This is in addition to its many other class-leading features like voice alerts, 3 model types and 250-model memory.

Item SPM6700, SPMR6700

Spektrum Heavy Duty 25mw FPV Camera

The VA2510 FPV camera is ideal for use in quad racers and surface vehicles where extra protection from shock and the elements is needed. It can be powered separately or through an auxiliary channel on the model's receiver. If powering it through the receiver, its integrated power filter will prevent interference from the model's motor and servos. You can also assign a transmitter switch or dial to whatever aux channel the camera is connected to and remotely change video frequencies.

Item SPMVA2510

Evolution® 10GX 10cc Petrol Engine with Pumped Carburettor

The new light weight Evolution® petrol engine features a new pumped carburettor, a new one-piece muffler, and exceptionally broad torque range. The ignition case is half the size of traditional ignition cases allowing for more mounting options and includes the standard 40-46 size beam style mount. It uses a 5% oil mixture with petrol vs a 18% oil mixture with glow fuel for less mess at the end of the day.

Item EVOE10GX2

UPDATED

Pro Boat® Westward 18-inch Sailboat V2: RTR

The Pro Boat Westward™ 18-inch sailboat provides entry-level sailboating enthusiasts with the perfect model when beginning the hobby. The Westward comes 95% prebuilt, requiring little preparation time to hit the water. Long gone are the days of having to assemble and rig before hitting the waves. Now just attach the keel to the hull—that's it. The sailboat's intricately-designed hull is made from blow-moulded ABS plastic for added strength, durability and great looks. The model's small size provides ease of use, allows users to sail the model in fairly small bodies of water and makes transportation easy.

Item PRB07002

Quick Hits

Dynamite™ Large Scale Work Stand

The all steel construction features a durable powdercoat finish, adjustable height and folds up for easy transport. The universal top fixture fits HPI, BAJA 5B, 5Tb, 5SC Losi-Sive-T, Losi Mini WRC, Losi Desert Buggy XL and more. The car fixture plate rotates 360° and flips to 90° allowing easier access to all areas of the chassis.

Item DYN7000

Spektrum Focal™ Wireless FPV Headset

Developed in cooperation with Fat Shark, the Focal™ FPV headset is a premium 5.8GHz headset that uses exclusive Spektrum™ technology for wireless head tracking and remote channel selection. It also boasts some of the most comfortable ergonomics available. A 2S 1800mAh LiPo battery with an LED voltage indicator is included.

Item SPMVR2500

Spektrum Alpha-6™ Stability Box

Whether they own a Spektrum™ transmitter or not, pilots everywhere can add the stability and precision of AS3X® technology to everything from .40-size sport models to giant-scale aircraft and jets. The Alpha-6™ Stability Box works with most any manufacturer's receiver and can be setup with or without the free programming interface. It supports individual servo connections as well as standard PPM and Spektrum™ SRXL serial receiver inputs.

Item SPMAS1000

CHROMA® ADD-ONS!

Blade® Chroma™ Wizard

The pocket-sized Chroma™ Wizard condenses all flight and gimbal controls of a Blade® Chroma camera drone into a small, lightweight unit that works like a TV remote. For instances when a pilot doesn't want to carry around the full controller, the Wizard incorporates flight modes such as Follow Me and Tracking. Additionally, the Wizard has a Point-N-Fly™ function meaning pilots can point to the sky and the Chroma will fly exactly where it's pointed.

Item BLH8645

Blade Chroma Backpack

The Chroma Back Pack is perfect for those looking for a stylish and useful way to transport their investment. Its specifically designed foam insert is perfect for dropping the Chroma without having to remove the landing gear and it protects the ST10+ radio and camera gimbal in their own compartments. The back pack can hold up to three batteries if one is stored in the Chroma itself. The back pack also has ample room for extra accessories that you may need on your next aerial adventure because its equipped with several pouches on the outside and even one on the inside.

Item BLH8648

Blade Chroma 11.1V 5400mAh LiPo Battery

Designed specifically for the Chroma, the 5400mAh cartridge-style flight pack consistently delivers 30-minute flight times and makes changing batteries easy.

Item BLH8619

Blade Chroma Charging Cable

High-Current charge adapter designed specifically for the Chroma.

Item BLH8624

Blade® Chroma™ Flight Case

This rugged flight case designed specifically for the Chroma features an extendable locking handle, wheels for easy towing and pre-cut foam insert. The rubber-sealed four-clamp lid keeps out dust and water.

Item BLH8649

Blade Chroma Propeller Set

Replacement propellers designed specifically for the Chroma. This set includes (1) "A" and (1) "B" propeller.

Item BLH8608

Spektrum™ 5.8GHz 25mw Micro Video Camera and VTX 5-13 volt

This small camera that can be installed practically anywhere. It requires an HAM license in the US but delivers range suitable for park flyers, and it can share power with the model without getting interference from the motor or servos

Item SPMVA2500

Dynamite® Tazer™ Twin Motor/ESC Combo

This competitively priced true 2 in 1 motor and ESC brushless power system is easy to install and a perfect upgrade path for 2WD, 1:10 scale ECX® and Vaterra® RTR owners. It features waterproof electronics and a highly efficient 3000kv power with 45A continuous and 100A peak AMP ESC.

Item DYNS1450

Dynamite® Glow Drivers with USB chargers

Access glow plugs to start your engines with Dynamite Glow Drivers. The USB charger adds flexibility and versatility to both the NiMH and LiPo glow drivers. The NiMH glow driver includes a meter indicating if the glow plug is good or if the unit needs recharging. The LiPo glow driver features a higher power output, non-self-discharging and no memory. An easy to see light indicates if either glow plug is good or if the unit needs recharging.

Mechanics: Flybarless CCPM with BeastX™ Technology

Battery: 2200mAh 3S 11.1V LiPo (included)

200 SR X with SAFE Technology

BLH2000EUC1, BLH2000EUC2 RTF / BLH2080EU BNF

Main Rotor Diameter: 410mm

Mechanics: Fixed pitch, flybarless with
SAFE™ Technology

Battery: 800mAh 3S 11.1V 30C LiPo (included)

270 CFX with SAFE Technology

BLH4850 BNF Basic

Main Rotor Diameter: 270mm

Mechanics: Collective-pitch flybarless
with BeastX® and SAFE™ Technology

Battery: 22.2V 910mAh LiPo

300 CFX

BLH4650 BNF Basic

Main Rotor Diameter: 550mm

Mechanics: Flybarless CCPM with BeastX™ Technology

Battery: 1350mAh 3S 11.1V 30C LiPo (required)

360 CFX

BLH4750 BNF Basic

Main Rotor Diameter: 790mm

Mechanics: CCPM with BeastX™ Technology

Battery: 1300mAh 6S 22.2V 30C LiPo (required)

180 CFX

BLH3450 BNF Basic

Main Rotor Diameter: 360mm

Mechanics: Flybarless CCPM with AS3X Technology

Battery: 450mAh 3S 11.1V 30C LiPo (included)

180 QX HD with SAFE Technology

BLH7400AC RTF / BLH7480A BNF
BLH7485 BNF w/o Camera

Rotor Diameter: (4) 135mm

Mechanics: (4) Geared motors with SAFE™ Technology

Battery: 500mAh 1S 3.7V 25C LiPo (included)

Pico QX with SAFE Technology

BLH8200I RTF International M2

Rotor Diameter: (4) 30mm

Mechanics: (4) Brushed motors with SAFE™ Technology

Battery: 80mAh 1S 3.7V LiPo (included)

Nano QX RTF with SAFE Technology

BLH7600C, BLH7600CMI RTF / BLH7680 BNF

Rotor Diameter: (4) 50.0mm

Mechanics: (4) Brushed motors with SAFE™ Technology

Battery: 150mAh 1S 3.7V 25C LiPo (included)

Nano QX 3D with SAFE Technology

BLH7100 RTF / BLH7180 BNF

Rotor Diameter: (4) 50mm

Mechanics: (4) Reversible motors plus SAFE™ Technology

Battery: 200mAh 1S 3.7V 30C LiPo (included)

Nano CP S with SAFE Technology

BLH2400 RTF, BLH2480 BNF

Rotor Diameter: 197mm

Mechanics: Collective-pitch flybarless with
SAFE Technology

Battery: 150mAh 1S 45C (included)

Scout 3 -ch Heli

BLH2700I RTF

Main Rotor Diameter: 165mm

Mechanics: Fixed pitch coaxial

Battery: 70mAh 1S 3.7V 14C LiPo (included)

mCP X BL

BLH3980EU BNF

Main Rotor Diameter: 263mm

Mechanics: CCPM with the AS3X™ Flybarless System

Battery: 200mAh 2S 7.4V 30C LiPo (included)

Micro AH-64 Apache with SAFE Technology

BLH2500 RTF, BLH2580 BNF

Rotor Diameter: 317.5mm

Mechanics: Brushless motors with SAFE™ Technology

Battery: 280mAh 2S 7.4V LiPo battery (recommended)

Inductrix

BLH8700 RTF, BLH8780 BNF

Rotor Diameter: 83mm

Mechanics: (4) Brushed motors with SAFE™ Technology

Battery: 150mAh 1S 3.7V 25C LiPo (included)

Nano QX FPV with SAFE Technology

BLH7200C, BLH7200CMI RTF / BLH7280 BNF w/o Headset

Rotor Diameter: (4) 50.0mm

Mechanics: (4) Brushed motors with SAFE™ Technology

Battery: 150mAh 1S 3.7V 25C LiPo (included)

200 QX with SAFE Technology

BLH7780EU BNF

Rotor Diameter: (4) 113mm

Mechanics: (4) Brushless motors with SAFE™ Technology

Battery: 800mAh 2S 7.4V 20C LiPo (included)

Glimpse™ FPV Camera Drone with SAFE Technology

BLH2200 RTF / BLH2280 BNF

Rotor Diameter: (4) 60mm

Mechanics: (4) Geared motors with SAFE™ Technology

Battery: 500mAh 1S LiPo (included)

Mach 25 FPV Racer with SAFE Technology

BLH8980 BNF

Rotor Diameter: (4) 127mm

Mechanics: (4) Brushless motors with SAFE™ Technology

Battery: 1350mAh 3S 11.1V LiPo (included)

Vortex 250 Pro BNF Basic

BLH9250

Rotor Diameter: 253mm

Mechanics: 2204-2300Kv brushless motors

Battery: 3S-4S 1350mAh Li-Po (required)

Chroma Camera Drone with SAFE Technology

BLH8665 w/1080p C-Go2+, ST-10
BLH8670 w/3-Axis Gimbal for GoPro Hero, DX4
BLH8675 w/4K C-Go3, ST-10+
BLH8680 BNF

Rotor Diameter: 675mm
Mechanics: (4) Brushless motors with
SAFE™ Technology
Battery: 5400mAh 3S 11.1V LiPo

Attitude V2 FCC-Certified Bundle (Fat Shark# 1044)

FSV2300

- 5.8GHz frequency operation
- Adjustable Inter Pupillary Distance (IPD) eye cups
- Built-in 3-axis head tracker
- Soft rubber eye cups block out ambient light
- Sleek ergonomic design with a rubberised texture shell
- Adjustable brightness and contrast
- Standard headphone port and video input/output ports
- Elastic head strap with battery holster
- SMA antenna connector
- Diopter option for farsighted users
- 2-3S LiPo compatible

BUNDLE INCLUDES

Item #	Description
--	Attitude VGA headset with SpiroNET antenna (bundle only)
FSV1202	CMOS 600TVL fixed camera
FSV1601	FCC certified video transmitter with SpiroNET antenna
FSV1410	Spektrum Head Tracker data cable
FSV1701	1A 7V4 headset battery pack
FSV1801	Headset banana charger adapter

** Bundle also includes headset carry case and lens cloth*

FAT SHARK

VISION SYSTEMS

DominatorV2 FCC-Certified Bundle (Fat Shark# 1061)

FSV2400

- Modular design for frequency and display versatility
- DVR capability with Micro-SD card port
- Includes standard video cable, carrying case and lens cloth
- Headset LiPo battery and charger included
- Adjustable Inter Pupillary Distance (IPD) adjustment and diopter option
- Soft rubber eye cups block out ambient light
- Adjustable brightness and contrast
- Standard headphone port and video in/out ports
- Elastic head strap with battery holster
- SMA antenna connector
- 2-3S LiPo compatible

NEEDED TO COMPLETE

Video-Receiver and Antenna
Video Transmitter and Antenna
Battery Tap with cables
VGA or HD Camera

OPTIONAL ADD ONS

Head Tracker Module
On Screen Display System
Multi-axis Camera Gimbal
Micro-SD memory card

**KickFlip 1/36 2WD
Desert Truck V2 RTR**

ECX00020

Included Battery: 1S 3.7V LiPo

**BeatBox 1/36 2WD
Monster Truck V2 RTR**

ECX00021

Included Battery: 1S 3.7V LiPo

**Ruckus 1/18th 4WD Monster
Truck RTR**

ECX010001T1 Black/Red / ECX010001T2 Orange/Yellow

Included Battery: 7.2V 900mAh Stick pack (flat)

**Torment 1/18th 4WD Short Course
Truck RTR**

ECX010011T1 Gray/Orange / ECX010011T2 Red/Orange

Included Battery: 7.2V, 900mAh stick pack (flat)

**Torment 1:10 2wd SCT BL:
Blue/White RTR**

ECX030081C

Included Battery: 8.4 volt 2400mah NiMH 7-cell flat pack with EC3

**Ruckus 1:10 2wd SCT BL:
Black/White RTR**

ECX030091C

Included Battery: 8.4V 2400mah NiMH 7-Cell Flat Pack with EC3

**Circuit 1:10 4wd Stadium Truck
Brushed: RTR**

ECX03061I

Included Battery: 7.2V 6-Cell 2400mAh NiMH

**Ruckus 1:10 4wd Monster Truck
Brushed: RTR**

ECX03062I

Included Battery: 8.4V 2400mAh NiMH

**Torment 1:10 4wd SCT
Brushed: RTR**

ECX03063I

Included Battery: 8.4V 7-Cell 2400mAh NiMH

Temper 1/18 4WD Crawler RTR

ECX01003

Included Battery: 7.4V 1200mAh NiMH

AMP 1/10 2WD Monster Truck RTR

ECX030281T1 Black/Green / ECX030281T2 White/Orange

Included Battery: 7.2V 1800mAh NiMH

AMP 1/10 2WD Desert Buggy RTR

ECX030291T1 Black/Yellow / ECX030291T2 White/Red

Included Battery: 7.2V 1800mAh NiMH

Ruckus 1:10 4wd MT BL, AVC: RTR
ECX03016I

Included Battery: 8.4V 3300mAh NiMH

Circuit 1:10 4wd ST BL, AVC: RTR
ECX03017I

Included Battery: 7.2V 6-Cell 3300mAh NiMH

Circuit 1:10 2wd Stadium Truck:RTR
ECX03050IT1 Blue/Silver / ECX03050IT2 Black/Silver

Included Battery: 7.2V 1800mAh NiMH

Ruckus 1:10 2wd Monster Truck: RTR
ECX03051IT1 Charcoal/Silver / ECX03051IT2 Green/Black

Included Battery: 7.2V 1800mAh NiMH

Boost 1:10 2wd Buggy: RTR
ECX03052IT1 White/Red / ECX03052IT2 Black/Green

Included Battery: 7.2V 1800mAh NiMH

Torment 1:10 2wd SCT: RTR
ECX03052IT2 Silver/Blue / ECX03053IT2 Black/Green

Included Battery: 7.2V 1800mAh NiMH

Outburst 1/14 Motorcycle RTR
ECX01004T1 Blue / ECX0104T2 Red

Included Battery: 120mAh 1S 15C LiPo

Revenge 1:8 4WD Buggy Type E BL: Red/Black: RTR
ECX04000c

Recommended Battery: 11.1V 5700mAh
3S 80C LiPo, Hardcase: EC3 (DYNP4010EC)

Ruckus 1:10 2wd MT BL, AVC: RTR
ECX03014

Included Battery: 7.2V 1800mAh NiMH

Torment 1:10 2wd SCT BL, AVC: RTR
ECX03015

Included Battery: 7.2V 1800mAh NiMH

Torment 1:24 4wd SCT: RTR
ECX00014T1 Black/Orange // ECX00014T2 Black/Red

Included Battery: 7.2V 1800mAh NiMH

Ruckus 1:24 4wd Monster Truck: RTR
ECX00013T1 Black/White // ECX 00013T2 Blue/White

Included Battery: 7.2V 1800mAh NiMH

Twin Hammers 1:10 DT 1.9 4WD Desert Truck: RTR

VTR03085

Included Battery: 7.4V 2000mAh 2S LiPo

1972 Ford Bronco 1/10 RTR

VTR03031

Recommended Battery: 2S 7.4V 4000mAh LiPo

1968 Ford F-100 1/10 RTR

VTR03028

Recommended Battery: 7.2V 1800mAh NiMH

2012 Nissan GTR GT3 V100-C 1/10th RTR

VTR030651

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

2012 Chevrolet Camaro ZL1 V100-S 1/10 RTR

VTR030071

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

Ford Raptor Pre Runner 4WD Truck 1/10th RTR

VTR03009C

Recommended Battery: 2S-3S LiPo battery with EC3™ connector

Ford Fiesta RallyCross 4WD 1/10th RTR

VTR03010

Recommended Battery: 11.1V 5000mAh 3S 30C LiPo
Hardcase: EC3

2014 Chevrolet Corvette V100-S 1/10th RTR

VTR030111

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

2012 CHP Chevrolet Camaro ZL1 V100-S 1/10th RTR

VTR030721

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

WATERRA

Ascender 1:10 4WD RTR

VTR03014C

Recommended Battery: 96mm "shorty" pack, 7.4V 2S LiPo

Ascender 1:10 4WD Kit

VTR03023

Recommended Battery: 96mm "shorty" pack, 7.4V 2S LiPo

1969 Camaro SS Brushless V100-S 1/10 4wd RTR

VTR03076I

Included Battery: Speedpack Silver 7.4V 3000mAh 2S 20C LiPo

1967 Ford Mustang V100-S 1/10th RTR

VTR03071I

Included Battery: : 1800mAh NiMH 6-cell Flat w/EC3

1969 Custom Corvette V100-S 1/10th RTR

VTR03022I

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

2015 Ford Mustang V100-S 4wd 1/10th RTR

VTR03084I

Included Battery: 1800mAh NiMH 6-cell Flat w/EC3

Twin Hammers 1.9 Rock Racer RTR

VTR03013I

Included Battery: 2000mAh 2S 7.4V LiPo

Twin Hammers 1.9 Rock Racer Kit

VTR03001

Recommended Battery: 7.4v 2200mah 2S LiPo pack

Audi R8 LMS Ultra FIA-GT3 BL RTR AVC: 1/6 AWD

LOS05003

Recommended Battery: 2 x 2S or 3S LiPo batteries
with EC5™ Connector

Technology: Equipped with AVC Technology

TEN-SCTE Troy Lee Designs RTR, AVC, Battery/Charger

LOS03005C

Included Battery: 7.4V 4000mAh 2S 30C LiPo Stick Pack
Technology: Equipped with AVC Technology

TEN-SCTE Troy Lee Designs RTR, AVC: 1/10 4WD SCT

LOS03001C

Recommended Battery: Rechargeable Battery 2-3S LiPo
with EC3™ Connector

Technology: Equipped with AVC Technology

LST XXL2-E RTR, AVC: 1/8 Electric 4WD MT

LOS04004

Recommended Battery: 2 x 50C+ LiPo battery with
EC5 connector

Technology: Equipped with AVC Technology

Mini Rally RTR: 1/14 4WD Rally

LOS01008

Included Battery: 7.2V 1200mAh 6-cell NiMH

Mini 8IGHT RTR, AVC: 1/14 4WD Buggy

LOS01004T1 Blue / LOS01004T2 Black

Included Battery: 7.2V 1200mAh NiMH
Technology: Equipped with AVC Technology

Mini Desert Truck RTR: 1/14 4WD Truck

LOS01007

Included Battery: 7.2V 1200mAh 6-Cell NiMH
Technology: Equipped with AVC Technology

Night Crawler 2.0 RTR: 1/10 4WD Rock Crawler

LOS03004

Recommended Battery: 7.2V NiMH or 7.4V LiPo Battery Pack

Mini 8IGHT-T RTR, Maifield Edition: 1/14 4WD Truggy

Prophet Sport Quattro 100Wx4 AC/DC Battery Charger

DYN4110

- Multi channel-chemistry design works with LiPo/LiFe & NiMH battery types
- Charges 1-6S LiPo/LiFe/NiMH

Prophet Sport 35W

DYNC2000 NiMH / DYNC2005 LiPo

- High-visibility, simplified user interface
- Select charge current from 0.1A to 4.0A with a single push button
- 0.1A Maintenance Mode Charging for battery repair/recovery

Prophet Sport Plus 50W

DYNC2010

- 50W charge power output for NiMH (1-8C) or LiPo (1-6S)
- High-visibility, simplified user interface
- Select charge current from 0.1A to 5.0A with a single push button

Prophet Sport Duo, 50Wx2, LiPo/NiMH Charger

DYNC2020

- 100W power output (50W Per channel)
- Charges two batteries simultaneously
- 2X 1-6S LiPo or 4-8C NiMH charging

Prophet Sport Quad 4 X 100W AC/DC Charger

DYNC2050

- 4 Channel Outputs – Charge different battery types and different charge rate simultaneously
- Multi channel chemistry: LiPo/LiFe, NiMH and lead acid

Prophet Precept 80W AC.DC Charger

DYNC2015

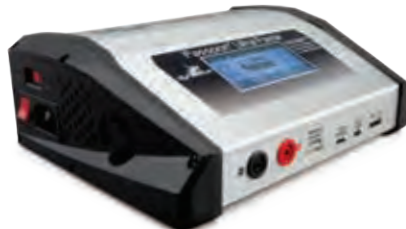

- Easy to use backlit LCD interface
- 1S-6S LiPo / 4-12-cell NiMH charging & 2A USB port
- Adjustable charge current from 0.1A to 6A

Voltage Checker & Discharger

DYNF0001

- Can be used to balance and discharge
- Supports 2-6S LiPo/LiFe battery types
- JST and UNI ports can display RX pack voltage

Passport UltraForce 220W Touch Charger

DYNC3010

- Touchscreen Interface for simple operation
- Powerful AC/DC Charger with a compact footprint
- 15 Amp, 220W Charger Power
- Charges LiPo/LiFe/LiIon, NiMH/NiCd and Pb batteries

Passport Ultra 100W ACDC Touch Charger

DYNC3000

- 100W powerful charging and 20 Battery Memory
- 0.1 to 10 amps for quick recharging
- Charges NiMH/LiPo/LiFe /LiIon/NiMH/NiCd and Pb

Unbeatable service and support

When you see Horizon Hobby on the box, you can rest assured that whatever radio control or model train product is enclosed includes the unbeatable customer support of Horizon Hobby Signature Service. The service team has decades of combined experience and stands ready to assist with any Horizon Hobby product purchase.

From our beginning, Horizon Hobby has believed the value of great service was well worth the investment in providing it. In fact, service was the only thing that set the company apart when starting out. Back then, the product selection wasn't anything special, and neither were the prices. It was an unrivaled attention to the customer's needs that earned us your business and helped us grow. We're driven to make our service and support second to none, and we're always working to keep getting better.

WHEN EVERY MILLISECOND COUNTS

PHIL FREYBOTT
SPEKTRUM FPV
TEAM PILOT

COUNT ON SPEKTRUM™ TECHNOLOGY

In the fast-paced world of FPV racing, Spektrum transmitters set the pace for signal speed, precision and security. Their proven DSMX® technology consistently delivers superb response in the noisiest RF environments. Just ask anybody who flies with one. Once you've experienced the telekinetic connection you feel at the sticks of a Spektrum system, you won't want to fly with anything else, whatever its price.
