

2012 brings a new stage for SCX, with Fábbrica de Juguetes acquiring the rights to develop, manufacture and sell SCX. As regards the relaunch of SCX, Fábbrica de Juguetes' first goal is to give products back the top quality and long duration they have always been known for, and so to recover the good reputation SCX has enjoyed from the very beginning. All this will be backed by major investment in research and development. We are very proud and we look forward to this exciting challenge, and our commitment to the brand is so strong that we are making waves with our technical innovations, new models, state of the art technology, promotional kits and an endless number of ideas and plans that will soon come to light.

2012 est une année charnière pour SCX. En effet, cette année la Société Fábbrica de Juguetes S.L.U. rachète les droits de conception, fabrication et commercialisation de la marque. Fábbrica de Juguetes s'est fixé comme premier objectif le retour à la qualité et la fiabilité de l'ensemble des gammes SCX, caractéristiques historiques de la marque, afin de récupérer le prestige qui a accompagné SCX depuis ses débuts. Tout cela sera soutenu par d'importants investissements en recherche et développement. Cet émouvant défi nous rend fiers, et notre engagement envers la marque est de sans cesse surprendre nos clients et consommateurs avec des innovations techniques, des nouveaux modèles, une technologie de pointe, des sets promotionnels et une infinité de nouvelles idées qui verront le jour.

En 2012 llega una nueva etapa para SCX, en la que Fábrica de Juguetes adquiere los derechos de desarrollo fabricación y comercialización de SCX. Fábrica de Juguetes se ha marcado como primer objetivo del re-lanzamiento de SCX devolver a sus productos la gran calidad y duración que siempre les ha caracterizado, con el fin de recuperar el prestigio que ha acompañado a SCX desde sus comienzos. Todo ello estará apoyado con importantes inversiones en investigación y desarrollo. Nos sentimos muy orgullosos y satisfechos de este emocionante reto, y nuestro compromiso con la Marca es tal que sorprenderemos a propios y extraños con innovaciones técnicas, nuevos modelos, tecnología de última generación, kits promocionales y un sinfín de ideas y planes que pronto verán la luz.

Im Jahr 2012 beginnt eine neue Etappe für SCX, nachdem "Fábrica de Juguetes" (Spielzeugfabrik) die Rechte für Entwicklung, Herstellung und Kommerzialisierung von SCX erlangt hat. "Fábrica de Juguetes" hat sich als erstes Ziel einen Relaunch für SCX gesetzt und will den Produkten ihre ehemalige hohe Qualität und Lebensdauer zurückgeben. Zwei Eigenschaften, die diese Produkte stets charakterisiert haben. Ziel ist es, das Prestige des Unternehmens wieder aufzubauen, das SCX seit seinen Anfängen gekennzeichnet hat. Alles dies wird von bedeutenden Investitionen in Forschung und Entwicklung begleitet. Wir sind sehr stolz und glücklich über dieser faszinierende Herausforderung. Unsere Verpflichtung gegenüber der Marke ist derart groß, dass wir Kenner und Neulinge mit technischen Innovationen, neuen Modellen, modernster Technologie, Werbekits und zahlreichen Ideen und Plänen überraschen werden, die schon bald vorgestellt werden.

Nel 2012 SCX giunge ad una nuova meta in cui la Fábrica de Juguetes acquisisce i diritti di creazione, produzione e commercializzazione di SCX. Fábrica de Juguetes ha stabilito come primo obiettivo il lancio del nuovo SCX per poter restituire ai propri prodotti la qualità e la robustezza che li hanno sempre caratterizzati per poter così recuperare il prestigio che ha accompagnato SCX fin dalla sua nascita. Tutto ciò è stato possibile grazie ad importati investimenti nell'ambito della ricerca e dello sviluppo. Siamo orgogliosi e soddisfatti di questa sfida emozionante e mettiamo tutto il nostro impegno per sorprenderci e sorprendere con innovazioni tecniche, nuovi modelli, tecnologia di ultima generazione, kit promozionali e tutta una serie di idee e progetti futuri.

### DIGITAL RACING TRACK SYSTEM

The new track for the analogue system allows users to make their tracks digital easily; this opens up a wide range of possibilities so they can enjoy more realistic car races. All these new features make the digital system much more interactive because it allows you to:

- Compete with up to 6 cars at the same time on a two-lane track.
- pass your opponents from any lane with the lane change button.
- Plan race strategies by changing lane, taking corners on the inside and stopping opponents from overtaking by going in front of them, making it difficult for them to advance.

### COMPATIBILITY TRACKS

The new circuits can be combined with the whole range of SCX 1/32 tracks and circuits on the market thanks to the compatibility tracks designed for this. These compatibility tracks are included in all the analogue sets: C1, C2 and C3.

### EASY-TO-ASSEMBLE TRACKS

The new track system allows users to assemble circuits more easily thanks to its new joints; they allow you to save time when building the circuits so you can start playing quickly.

### TRACKS WITH MORE FEATURES

The new track system, while maintaining the high quality common to any SCX track, also includes the following improvements:

- Side plastic protectors for the rails, thus improving the movement and direction of the car blades.
- Wider and more stable tracks, allowing you to drive the car in a more precise, effective way.
- Technical material that offers users greater flexibility and strength when it comes to assembling a circuit.
- Surface of maximum adherence and uniformity, improving quality.

### SYSTÈME DE PISTES DIGITALISABLES

La nouvelle piste du système analogue permet de digitaliser facilement les pistes, ouvrant un large éventail de possibilités pour profiter encore plus du réalisme des courses de voitures. Toutes ces nouvelles prestations permettent au système digital d'être beaucoup plus interactif, grâce au fait qu'il permette :

- D'avoir jusqu'à 6 voitures en même temps sur une seule piste à deux voies.
- De doubler de façon réelle depuis n'importe quelle voie.
- De planifier des stratégies de course en changeant de voie, traçant les virages par l'intérieur et empêchant les adversaires de doubler en se plaçant devant eux et gênant leur avance.

### PISTES DE COMPATIBILITÉ

Les nouveaux circuits peuvent être combinés avec toute la gamme de pistes et circuits SCX 1/32° commercialisés jusqu'à présent, grâce aux pistes de compatibilité conçues à cet effet. Ces pistes de compatibilité sont incluses dans tous les sets analogiques : C1, C2 et C3

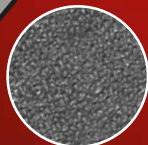

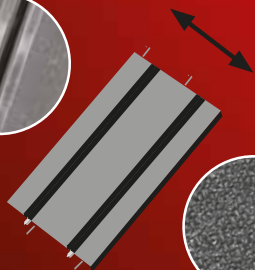

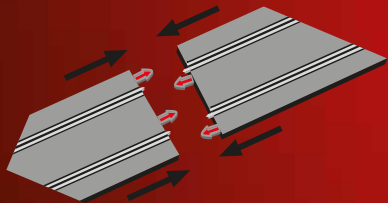

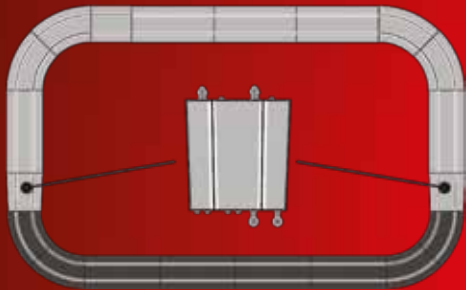

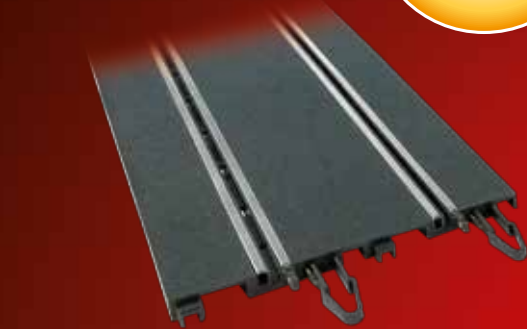

### PISTES FACILES À MONTER

Le nouveau système de pistes permet de monter plus facilement les circuits grâce à ses nouveaux ancrages, qui permettront de gagner du temps de montage et donc de commencer à jouer plus rapidement.

### PISTES AVEC PLUS DES PRESTATIONS

Le nouveau système de pistes garde l'excellent niveau de qualité caractéristique de toutes les pistes SCX, et apporte les améliorations de prestations suivantes :

- Protection latérale plastique des rails, qui améliore le glissement et la direction du guide de la voiture.
- Plus grande largeur et stabilité des pistes, permettant un pilotage plus précis et efficace.
- Matériel Technique qui offre une plus grande flexibilité et robustesse pour le montage de quelconque circuit.
- Surface adhérent au maximum et uniformité améliorant les prestations.

## SISTEMA DE PISTAS DIGITALIZABLES

La nueva pista para el sistema analógico permite digitalizar fácilmente las pistas, con lo que se abre un abanico de múltiples posibilidades para disfrutar con mucho más realismo de las carreras de coches. Todas estas nuevas prestaciones hacen que el sistema digital sea mucho más interactivo gracias a que permite:

- Competir con hasta 6 coches a la vez por una sola pista de 2 carriles.
- Adelantamientos reales desde cualquier carril.
- Planificar estrategias de carrera cambiando de carril, trazando las curvas por el interior e impidiendo los adelantamientos de los adversarios situándose delante de ellos y obstaculizando su avance.

## PISTAS DE COMPATIBILIDAD

Los nuevos circuitos se pueden combinar con toda la gama de pistas y circuitos SCX 1/32 comercializados hasta el momento, gracias a las pistas de compatibilidad diseñadas para tal fin. Estas pistas de compatibilidad están incluidas en todos los sets analógicos: C1, C2 y C3

## PISTAS DE FÁCIL MONTAJE

El nuevo sistema de pistas permite montar más fácilmente los circuitos gracias a sus nuevos anclajes los cuales permitirán ahorrar tiempo de montaje y empezar a jugar rápidamente.

## PISTAS CON MÁS PRESTACIONES

El nuevo sistema de pistas, manteniendo el alto nivel de calidad característico de todas las pistas SCX, aporta las siguientes mejoras prestacionales:

- Protección lateral plástica de los raíles, que mejora el deslizamiento y dirección de la guía del coche.
- Mayor anchura y estabilidad de las pistas, permitiendo un pilotaje más preciso y eficaz
- Material técnico que ofrece una mayor flexibilidad y robustez para el montaje de cualquier circuito.
- Superficie de máxima adherencia y uniformidad mejorando las prestaciones.

## SYSTEM FÜR DIGITALISIERBARE BAHNEN

Die neue Bahn für analoge Systeme ermöglicht es, die Bahnen auf leichte Weise zu digitalisieren, womit sich eine Vielzahl von Möglichkeiten eröffnen, um die Rennen auf wesentlich realistischere Weise zu genießen. Alle diese neuen Anwendungen machen das Digitalsystem interaktiver, denn es erlaubt:

- Mit bis zu 6 Wagen gleichzeitig auf einer einzigen zweispurigen Bahn ins Rennen zu gehen.
- Echte Überholmanöver von jeder Fahrspur aus zu starten.
- Rennstrategien zu wählen wie Fahrspurwechsel, innen-seitiges Kurvenfahren und Verhindern von Überholmanövern der Rivalen, um sich so vor ihnen zu positionieren und ihr Vorbeiziehen zu behindern.

## KOMPATIBLE BAHNEN

Die neuen Rennbahnen können mit dem gesamten Angebot von Bahnen und Rennstrecken SCX 1:32 kombiniert werden. Im Handel erhältlich dank der für diesen Zweck designten kompatiblen Bahnen.

Die kompatiblen Bahnen sind in allen analogen Sets C1, C2 und C3 enthalten.

## LEICHT MONTIERBARE BAHNEN

Das neue Bahnsystem erlaubt es, die Rennstrecken leichter zu montieren, denn sie verfügen über neue Verankerungen, die Zeit beim Aufbau sparen und so schneller zum Spielvergnügen führen.

## BAHNEN MIT MEHR LEISTUNGEN

Das neue Bahnsystem bietet nicht nur das hohe Qualitätsniveau aller Bahnen von SCX, sondern auch folgende neue Leistungen:

- Seitlicher Plastikschutz an den Fahrspuren, der ein besseres Gleiten und eine bessere Lenkung der Wagen garantiert.
- Breitere und stabilere Bahnen, die eine präzisere und effizientere Fahrweise erlauben.
- Technisches Material, das mehr Flexibilität und Robustheit beim Aufbau einer jeden Rennbahn bietet.
- Oberfläche mit maximaler Haftung und Gleichförmigkeit, was bessere Leistungen garantiert.

## SISTEMA DI PISTE DIGITALI

La nuova pista per sistemi analogici permette digitalizzare facilmente le piste offrendo così molteplici possibilità per godersi con più realismo le gare di macchine. Tutte queste nuove prestazioni rendono il sistema digitale più interattivo in quanto permette:

- Gareggiare con un massimo di 6 macchine contemporaneamente in un'unica pista di 2 corsie.
- Sorpassi reali da qualsiasi corsia.
- Pianificare strategie di corsa cambiando corsia, facendo curve dall'interno o impedendo sorpassi degli avversari posizionandosi davanti a loro ed ostacolando la loro gara.

## PISTE DI COMPATIBILITÀ

I nuovi circuiti si possono combinare con tutta la gamma di piste e circuiti SCX 1/32 ancora in vendita grazie alle piste di compatibilità create con questo scopo.

Queste piste sono comprese in tutti i set analogici: C1, C2 e C3

## PISTE FACILI DA MONTARE

Il nuovo sistema di piste permette di montare più facilmente i circuiti grazie ai nuovi agganci che permettono di risparmiare tempo durante il montaggio e sfruttarlo per giocare.

## PISTE CON PIÙ PRESTAZIONI

Il nuovo sistema di piste conserva l'elevato livello di qualità che caratterizza tutte le piste SCX e fornisce ulteriori e migliori prestazioni:

- Protezione laterale dei binari in plastica che migliora lo scivolamento e la direzione di guida della macchina.
- Maggiore larghezza e stabilità delle piste per una guida più precisa ed efficace.
- Materiale Tecnico che offre una maggior flessibilità e robustezza per il montaggio di qualsiasi circuito.
- Superficie di massima aderenza ed uniformità migliorandone le prestazioni.
