## MODEL ROCKET INSTRUCTIONS

KEEP FOR FUTURE REFERENCE

**IMPORTANT:** Please record date found on box and keep for future reference.

**READ ALL INSTRUCTIONS.** Make sure you have all parts and supplies.

### ASSEMBLE ENGINE MOUNT FIN CAN UNIT

## ATTACH BODY TUBE

1. Align slots in body tube with notches on fin can unit. Slide body tube over fin can unit until notches on fin can match up with slots in body tube and snap in place.

ALIGN

You may add clear tape as reinforcement around body tube where it meets fin can unit.

## ATTACH SHOCK CORD MOUNT

1. Insert mount through square hole.

ROUND END TO FRONT

2. Orient anchor as shown and slide it down the inside of body tube until it snaps into place.

### NOTE:

You may need a pen or pencil to help push anchor in place.

## INSTALL SHOCK CORD

1. Tie double knot in end of shock cord.
2. Insert unknotted end of shock cord through opening of shock cord mount.

3.

4. Pull on shock cord to confirm knot is snug and won't pull through shock cord mount.

DOUBLE KNOT RESTS SNUGLY IN SHOCK CORD MOUNT

## ATTACH PARACHUTE AND SHOCK CORD

## PREPARE FLIGHT RECOVERY

## PREPARE ENGINE

### WARNING: FLAMMABLE

To avoid serious injury, read instructions & NAR Safety Code included with engines. **PREPARE YOUR ENGINE ONLY WHEN YOU ARE OUTSIDE AT THE LAUNCH SITE PREPARING TO LAUNCH.** If you do not use your prepared engine, remove the starter before storing your engine.

### NOTE:

When tightening engine cap, make sure launch lugs are centered between engine retainer cap ridges.

## NOTE:

Key always out until final countdown!

## ESTES LAUNCH SUPPLIES NEEDED (Sold Separately)

- Recovery Wadding
- Launch Pad
- Launch Controller
- Starters (with engines)
- Plugs (with engines)
- Estes® Engines:  
A8-3 (first launch), B4-4, B6-4, C6-5, C6-7

## NOTE:

Fully extend your launch controller wire before launching.

Insert key, push down hard. Bulb will light.

## NOTE:

While holding key down FIRMLY, press launch button until LIFTOFF!

## NOTE:

Estimated weight: 1.3 oz. (36.9 g)

## PRECAUTIONS

NAR SAFETY CODE

NO DRY GRASS  
OR WEEDS

**PRE-LAUNCH CHECK** For safety, never launch a damaged rocket. Check the rocket's body, nose cone and fins. Also, check the engine mount, recovery system and launch lug(s). Repair any damage before launching the rocket.

**FLYING YOUR ROCKET** Choose a large field (500 ft. [152 m] square) free of dry weeds and brown grass. The larger the launch area, the better your chance of recovering your rocket. Football fields and playgrounds are great. Launch only with little or no wind and good visibility. Always follow the National Association of Rocketry (NAR) SAFETY CODE (enclosed).

**MISFIRES** TAKE THE KEY OUT OF THE CONTROLLER. WAIT ONE MINUTE BEFORE GOING NEAR THE ROCKET! Disconnect the micro clips and remove the engine. Take the plug and starter out of the engine. A burned starter means the starter tip was not touching engine propellant. Install a new starter; be sure the tip is touching propellant inside engine. Repeat the steps under Countdown and Launch.
