## **Installation and Maintenance:**

- Make certain the 4mm motor screws being used do not extend into the motor more than 0.18 in (4.5mm). Otherwise, you can internally damage the stator windings.

- If the motor runs in the opposite direction desired, unplug any two motor wires, reverse the location and plug back together.
- Do not over-tighten the motor screws.
- Brush off dirt and dust frequently from the bearings. Place a drop of oil on each bearing at the same time.
